

Founded in 1983, the Photonics Industry and Technology Development Association (PIDA) serves as a nexus for vision, transformation, and growth of the photonic industry in Taiwan. The goal of PIDA is to support the development of Taiwanese photonic industry by conducting trend analysis, increasing efficiency of information exchange, and encouraging collaboration among academia, industry, and government. PIDA develops five domains — market research, conferences, exhibitions, membership services, and publications — to ensure the ongoing success of these missions. Over the past few decades, PIDA has become the foremost think tank in the field of photonics.

PIDA Activities

Industry Research

PIDA has a team of professional analysts that continually monitors all kinds of statistical information in both local and international photonic industry. In-depth reports are provided for members, research institutes, as well as the Taiwanese government. By offering accurate and reliable information, "PIDA" has become the most trusted name regarding industry research.

Exhibitions

With the success of the " Photonics Festival in Taiwan," PIDA shows its remarkable ability to hold concurrent exhibitions to meet industry needs. These exhibitions include OPTO Taiwan, LED Lighting Taiwan, Optics Taiwan, Solar Taiwan, and concurrently -held Display Taiwan. The Photonics Festival is not only the most representative exhibition in Taiwan but also one of the most influential exhibitions worldwide in photonic industry.

Conferences and Seminars

In order to enhance the cooperative effort among academia, industry, and research institutes both domestically and internationally, PIDA also seeks to play a role of the mediator by holding conferences and seminars. Conferences / seminars held by PIDA cover the entire spectrum of photonics, drawing researchers, specialists, and practitioners from different fields to share the latest information in photonic industry.

Membership Services

As a member of PIDA, one would receive the latest information in the industry on a weekly-basis to take control of the future trend. Members would also benefit by the latest photonic news, research reports, consulting service, seminar discounts, and exclusive promotion.

Publications and Websites

PIDA's various publications provide customers with information of the most current technologies and products.
Optolink — Chinese Bi-monthly
Optolink International Edition (OLIE) — English Quarterly
Display All — Chinese Quarterly
Market Report — Chinese Quarterly and Annual

Online publications include:
The PIDA Post — English Monthly
Japan & Korea Photonics Newsletter — Chinese Weekly Industry News
PIDA Intelligence — Chinese Bi-weekly Industry Update

PIDA's website — www.pida.org.tw — is available in Chinese, English and Japanese, and is an easy access to the latest news, products, and Taiwanese manufacturers. PIDA continues to be a step ahead to improve the photonic industry from every aspect.
